*The awards we've won don't just make us feel proud.
They also give you an idea of what the University is like.*

Teaching
Excellence
Framework

Teaching Excellence Framework Gold Award

Huddersfield is a TEF gold-rated institution delivering consistently outstanding teaching and learning of the highest quality found in the UK (*Teaching Excellence Framework, 2017*). This confirms the University of Huddersfield as one of the top educational institutions in the UK for employability, teaching and learning*.

*The University of Huddersfield's TEF Gold rating was awarded in June 2017. It is valid for up to four years from that date, and may be subject to change.

Global Teaching Excellence Award

We won the first Global Teaching Excellence Award. It recognised the University's commitment to world-class teaching and its success in developing students as independent learners and critical thinkers (*HEA, 2017*).

University of the Year

The Times Higher Education named us as their University of the Year in November 2013. They liked our 'bold, imaginative and innovative initiatives.'

A Five Star University

QS Stars have given us five stars for Internationalisation. That means we are "highly international, demonstrating excellence in our international student growth, facilities, teaching and research collaborations."

First in England

Knowledgeable, qualified teachers can inspire you and help you to achieve great things. We've been the English university with the highest proportion of professionally-qualified teaching staff for four years running (*HESA – first awarded in 2016, maintained in 2017, 2018 and 2019*).

Athena Swan

We're serious about gender equality. We want an equal number of men and women on our science and engineering courses, for instance. Our commitment was recognised in 2015 with the Athena SWAN Bronze Award.

Teaching excellence

What makes Huddersfield so special?

*We're recognised as a centre of teaching excellence.
Here are just some of the reasons why.*

Our professionalism extends way beyond the confines of the campus. We actively engage with professional, statutory and regulatory bodies to ensure we teach in a way that will help you to progress your career, as well as deepen your knowledge and broaden your experience. As a result, you'll find that many of our courses have been recognised or accredited by external professional bodies.

- ◆ We were the first university in England to achieve recognition as having the highest proportion of professionally-qualified teaching staff*: Just under 95% of our academic staff hold an appropriate teaching qualification.
- ◆ We've been the UK's leading university for National Teaching Fellowships over the last ten years, winning more than any other institution. Think of them like the teaching Oscars – they rate the UK's best lecturers. It's part of our ongoing drive for teaching excellence, which helps you achieve great things too.
- ◆ We're the first and only UK university where 100% of permanent teaching staff** are Fellows of the Higher Education Academy. So you'll learn from some of the best, helping you be the best.

**HESA – First awarded in 2016, maintained in 2017, 2018 and 2019.*

***Permanent staff, after probation: some recently appointed colleagues will only obtain recognition in the months after their arrival in Huddersfield, once they have started teaching.*

“By choosing to study at the University of Huddersfield you’ll benefit from a hugely experienced teaching team. You will be taught by staff who are at the forefront of their subject area as all permanent staff have, or are completing, doctorates. Meaning you will benefit from research informed teaching delivered by experts in their field.

We also offer a whole range of specialist support to ensure you get the most out of your studies including academic and professional support.”

Jodie Boyd

Senior Lecturer in Career Guidance
and Development

Inspiring teaching

What better way to demonstrate first class teaching than by speaking to our students and one of our award-winning academics?

Senior Lecturer in English Literature Dr Todd Borlik – who was born in Indianapolis, USA – loves teaching in the UK and at the University of Huddersfield.

“The University is a diverse and vibrant community and the teaching staff are truly dedicated to their students.”

Having previously taught at the University of Washington and Bloomsburg University, Todd likes how well the UK education system enables teachers to get to know their students, and believes his teaching has been enhanced as a result.

Adapting teaching to the needs of students

“Students learn in different ways and I adapt my teaching methods because of this,” says Todd.

Todd describes how his approach to teaching has been shaped by his students:

“In response to conversations with BAME (black, Asian, and minority ethnic) students at Huddersfield, I developed a module titled ‘Global Shakespeares’, which surveys the vibrant history of Shakespearean adaptation across cultures all over the world.”

The module was met with such enthusiasm from students that it won a ‘Diversity Prize for Curriculum Innovation at the University.’ Todd says of the award, *“It was indisputably one of the highlights of my teaching career.”*

What makes a great teacher?

“Perhaps the most important thing a teacher can do is to radiate conviction in the significance of the subject,” believes Todd.

English Literature BA(Hons) student Aaisha Raja agrees. *“Todd’s a great teacher in many ways, but one of them is his ability to really make his subject matter relevant,”* she said.

Todd’s passion and enthusiasm for his subject is clearly infectious.

“I wear my enthusiasm for Shakespeare on my sleeve,” he said. Aaisha added: *“Todd is incredibly engaging – he has the ability to interest everyone in the subject that he lectures about.”*

“The teaching staff at Huddersfield are truly dedicated to their students.”

Sushmita Gudimella Computer Science BSc(Hons)

Meet Sushmita, who is originally from Hyderabad in Southern India, and came to Huddersfield to study a Bachelor's degree in Computer Science. As part of her degree course at Huddersfield, Sushmita undertook a year-long work placement with aerospace giant Airbus.

"One of the main reasons that I applied to Huddersfield was the opportunity to do a placement year in industry. The chances of getting a job are high when you do a placement in the UK, and the Placement Unit at the University helped me to prepare my CV, cover letter, and practice for assessment centres and interviews.

During my placement at Airbus, I worked in the Information and Communications Technology department as an Information Management Intern. I worked on software tools which were used to design parts of an aircraft.

My key responsibilities were to fix bugs in the software tools or framework and enhance existing tools, manage all the licenses, lead adaptive maintenance of software and I produced monthly reports. I also performed weekly tests on all the software tools to ensure everything was working as it should.

I worked on four major projects at Airbus, which included a software tool for designing the ribs present in the wings of an aircraft, and a tool to design the fuel tank. Both of these software tools were really complicated and they were integrated with a computer-aided design tool called CATIA.

These projects really stand out to me as I had an opportunity to take a prototype tool all the way to a production ready standard. I also got the chance to be involved in every stage of the software design and development life cycle.

All the projects I worked on have helped me to develop my technical and interpersonal skills. On my placement, my role was completely based on Python programming language, which I was able to learn and implement in my final year project when I returned to University, which was a collaborative project with Airbus.

At the end of my placement, based on my performance, I was nominated for the graduate scheme by my manager. I had to have an interview at the end of my placement and I was offered a graduate role at Airbus, which begins a few weeks after I graduate.

The best thing about doing my placement year was the personal development I can see in myself. I have definitely gained immense technical skills, and whilst I used to be afraid to voice my opinions, I can now see a great change in myself. I recently attended a placement session to help second year students at the University, and I could discuss my experience and opinions with great confidence. I think this is one of the best things I've gained from my placement."

Sushmita working on her final year project

On placement at Airbus

“The best thing about doing my placement year was the personal development I can see in myself.”

Students' Union Officer Team 2019-2020

Campaigning for election

In the Students' Union

Thank You Awards 2018

Inspiring student

Emmanuel Haruna

Education Officer July 2018 - July 2019
Students' Union President July 2019
Huddersfield Students' Union

Emmanuel Haruna came to the University of Huddersfield to study a Master's degree in Oil and Gas Engineering with Management. During this time, he became involved with the Students' Union, running for a paid sabbatical position as the Education Officer.

"My first contact with the Students' Union was when I was acting as an academic representative for my course. Only one year after I arrived in the UK, I saw the opportunity to give back to the system that had positively contributed to my development, so I took part in the Students' Union elections and was elected as Education Officer.

As Education Officer, I worked on a peer mentoring project to increase the availability of peer to peer support across campus. I have also raised over £1,500 for local charities, and worked on a policy review and amendment to improve students' academic experience, which I have been particularly happy to see implemented across the University.

I have had the opportunity to work with academics across campus on various projects. These have included sitting on decision making committees that look at student experience and academic matters, organising school and district wide music concerts with the Christian students' community and also working with students from over 100 countries on a variety of projects. I have met and discussed topics with Members of Parliament and councillors from the local council in Huddersfield, and worked with the Mayor of the Huddersfield district.

I feel I still have so much to give back to the community. Working with students, and seeing the help and support they gained from my work, contributed to my decision to continue with the Students' Union, and I was recently elected as the President of the Students' Union.

I am really looking forward to continuing this chapter of my time here at Huddersfield. The truth is, the opportunities here are endless and I am happy I chose to study in Huddersfield.

However busy you are with studies, find the time to get involved with a society or representing other students, as these are the things that really help you develop and grow as a person."

"I am really looking forward to this next chapter of my time here at Huddersfield."

Career support

The Careers and Employability Service is committed to developing the employability of our international students at the University of Huddersfield.

We offer students a range of support to help them progress their careers including activities to help them develop new skills, opportunities to meet employers on campus and individual appointments with our professionally qualified careers advisers.

Our careers tools allow students to:

- ◆ Create a CV
- ◆ Use an interview simulator
- ◆ Prepare for assessment centres
- ◆ Practice psychometric tests
- ◆ Watch short videos from industry experts to help them with applications
- ◆ Effectively prepare for jobs fairs.

The Huddersfield Graduate Programme

The University of Huddersfield is dedicated to developing employable graduates with 'hands on' industry experience. The Huddersfield Graduate Programme provides students with the opportunity to gain transferable skills with local businesses to enhance CVs and give our graduates that competitive edge.

Not only do our internships help put theoretical knowledge into practice, they are exclusive to our graduates, who we support through the application process. This includes advice on checking cover letters, CVs and arranging mock interviews to ensure graduates are fully prepared and confident when applying for graduate jobs.

Our internships are paid roles, in a range of sectors from marketing and web design, to journalism and HR. The internships run for 10 weeks and provide a solid foundation for a successful career after graduation.

"All students have the same access to resources but we understand that some international students have additional requirements. We help them with their career direction, offer employer-led workshops and help them understand the UK market. We also assist students with finding part-time work and talk about the importance of developing themselves as global professionals.

For me it's all about helping students to take control of their own careers; whether that's through using our online resources to identify potential employers they might want to work for, or getting individual support with developing a personal strategy for career success. It could also be learning more about what employers look for and then signing up for activities so they can gain new skills."

"For me it's all about helping students to take control of their own careers."

The Enterprise Team

The University's Enterprise Team provides free support to current students and graduates of up to five years who are exploring freelancing, self-employment and business start-up.

The type of business support offered to international students and graduates is determined by the specific visa which each individual holds. Most international students and graduates will be eligible for generic business information through the Enterprise Workshops, which run during the autumn and spring terms. Find out more at hud.ac.uk/enterprise

The 3M Buckley Innovation Centre is home to the Enterprise Team at Huddersfield. This £12 million building was opened in 2013 and is a unique place that encourages new businesses to get off the ground.

Start-Up Visa

Non-EEA international graduates of the University of Huddersfield are potentially eligible to apply for the new Start-Up Visa scheme which replaces the Tier 1 (Graduate Entrepreneur) scheme. The Start-Up Visa offers an opportunity to start up a new business in the UK. This route is open for graduates of the University of Huddersfield who wish to develop an innovative and viable business idea which meets the current UKVI requirements for the scheme. The rigorous application process must be endorsed by the University before a graduate can apply for a visa for two years. The scheme is run by the Enterprise Team working in partnership with the International Office. Non-EEA graduates and current international students are advised to contact the International Office for initial advice and to confirm eligibility of their current immigration status for potential transfer into the Start-Up Visa scheme.

Xiao Lu (Sandy)

Horizon Risk Consultancy Ltd

Sandy, a highly qualified and experienced professional, is on the Tier 1 (Graduate Entrepreneur) Visa programme, predecessor to the Start-Up Visa programme. She provides integrated and practical risk management solutions to UK businesses, helping them access and grow in the Chinese market. She also helps them reduce business risks and improve efficiency.

“I have 14 years’ occupational health, safety and environmental management experience in leading global companies. I completed my Master’s by Research in Safety Culture at the University of Huddersfield in 2016 and started up Horizon Risk Consultancy Ltd in January 2017 to support UK businesses.”

From the initial discussion about my business idea, the Enterprise Team offered me tremendous support and guidance including one-to-one business advice, help with business plans, business coaching and quarterly meetings to periodically review my progress.

The Enterprise Workshops equipped me with essential knowledge around legal issues, accounting, insurance, branding, public relations, sales and marketing and social media. I also had access to free state-of-the-art office space and facilities in The Duke of York Young Entrepreneur Centre which enabled me to work more efficiently.

The business advisers in the Enterprise Team have given me valuable knowledge and skills in various aspects of business development. The opportunity to work internationally from the UK has helped me to develop a global perspective and an international network. Working with a diverse range of entrepreneurs, I have also had the opportunity to share business information and experience, and explore opportunities to collaborate.”

“The business advisers in the Enterprise Team have given me valuable knowledge and skills in various aspects of business development.”

Explore Huddersfield

You'll discover a warm Yorkshire welcome in Huddersfield, a cosmopolitan and lively town set in stunning countryside.

Huddersfield's historic railway station

Huddersfield's shopping district

Local cafés and restaurants

John Smith's Stadium - home to Huddersfield Town Football Club

Location, location, location

It's all about the location. Beautiful countryside, great shopping, big nightlife, sporting legends... they're all on your doorstep when you're living in Huddersfield. And did we mention the people? This has to be one of the friendliest places on earth.

You're coming here to broaden your horizons. And what better horizon than the charming and majestic Pennine hills? Or the beautiful town of Huddersfield itself, for that matter. It's a cosmopolitan, bustling and energetic place, with lots of restaurants, cafés and bars, plus great sports facilities and shopping.

Leeds and Manchester are both just a quick train ride away and it's easy to reach the rest of the UK by bus, car, train or plane.

Put yourself in the picture

It's hard to put into words just how special Huddersfield is. But pictures give you a much better idea. Take a look at our gallery of photos taken by students and staff. Or watch a film or two about our different days out.

You'll find it all at hud.ac.uk/explore-hud

One of the world's top destinations – and that's official

Lonely Planet named Yorkshire as one of the world's top destinations (*Lonely Planet's 2014 Best In Travel List*). They've even put together a guide on Huddersfield, especially for students. It's filled with tips on where to go and what to do.

"Huddersfield is a peaceful and happy town, and there's always a range of activities for students to take part in, like the Food Festival. I love studying here!"

Our campus

Our University is pretty special. All on one campus, all in the centre of a vibrant town and at the heart of a beautiful part of the world.

On campus you'll find all academic schools, the library, quiet study spaces and all our research facilities. There are plenty of places to eat, drink and meet friends too, plus the town centre is only a two-minute walk away with loads of cafés, bars and restaurants.

You can find details of how to get to the University, car parking and campus maps, including an accessible map, on our website hud.ac.uk/about/maps

Investment on campus

£156m

NEARLY £156 MILLION
INVESTED IN EXCITING NEW
BUILDINGS ON CAMPUS

We've invested nearly £156 million in exciting new buildings and top class facilities to make our campus an amazing place to learn.

Huddersfield's proud industrial heritage is evident on campus, with beautifully converted stone mills and a working canal. But thanks to our ongoing investment, there are plenty of impressive 21st Century buildings too.

Take a tour of campus at hud.ac/campus

We'd like to introduce some of the more recent additions to the campus:

1. Barbara Hepworth Building

Opened 2019

This is the £30m new home for the study of art, design and architecture at the University. An exciting hub of creative studios and technology facilities, it brings digital and physical innovation together in one space.

4

2. Oastler Building

Opened 2017 – £27.5 million

This impressive building takes lectures and classrooms into the future, with innovative space and facilities for law and humanities students.

5

3. Joseph Priestley Building refurbishment and extension

Opened 2019

This £31m project provides specialist modern teaching, workshop and laboratory facilities for Science subjects including pharmacy, chemistry, biological sciences, geography and forensic science. The development provides excellent modern IT facilities, a student hub and social space.

6

4. Richard Steinitz Building

Opened in 2008 – £16 million

A truly inspiring place to study, this building features stunning architecture and impressive green credentials.

7

5. Student Central

Opened 2014 – £22.5 million

The hub of campus life. This massive building brings sports, library, leisure and learning into one buzzing and happening facility.

6. 3M Buckley Innovation Centre

Opened 2013 – £12 million

This is where the University and businesses really come together. It's a unique place that encourages new businesses to get off the ground. So if you've got the entrepreneurial spirit, this could be where it all starts.

7. Charles Sikes Building

Opened 2010 – £17 million

One of the greenest buildings on campus, the Charles Sikes Building offers contemporary classrooms, space to study and socialise, computer rooms, and a coffee shop for our business students.

Cutting-edge facilities

Innovative buildings and equipment, incorporating dramatic design, dynamic shape and key environmental features create world-class facilities for our students and staff.

Automotive laboratory

Forensic Science laboratory

SPIRAL - Spatialisation and Interactive Research lab

“The University has a range of facilities and is always investing in the campus. On my Architectural Technology course, I have access to specialist computer suites with design software, which I use for all my projects.”

Harry Khant
Architectural Technology BSc(Hons)

Myanmar

Student Central

Chances are this is going to become the centre of your universe. Student Central is where it all happens and where students hang out on campus.

“Student Central is such a student oriented place. It’s one of my favourite places on campus because it’s all about students. I love the fact that we have our own shop at the University, and I love playing badminton with Team Hud, it’s so easy to book a court in our Sports Hall.”

Rumana Khan
Education BA(Hons)

India

First Floor

Students' Union

This is where you can find out about joining sports clubs and societies, or taking part in elections. The Students' Union offers advice and support too.

Ground Floor

International Office

The International Office provides support and guidance for international students.

iPoint

Got a question or need help? Come to iPoint. Our friendly team will point you in the right direction.

Students' Union shop

From stationery to pasta, drop by for those must-haves. You don't even need to go to town.

Food and drink

Grab a coffee at Starbucks or Costa. Or have a bite to eat in our pizza bar or Oriental Express station.

The Library and computer suites

Come here for research or revision, or just a quiet place to work.

Santander bank

We've got our very own branch on campus, so you can take out cash and talk to staff face-to-face.

DIGS student accommodation offices

Our preferred, recommended and approved accommodation provider has its offices opposite the Santander bank.

Support services

All our careers, finance, wellbeing and disability teams are all based here.

Lower Ground Floor

Team Hud

At the bottom of the spiral staircase you'll find cutting-edge sports facilities. There's a fitness centre, badminton courts, squash courts and dance studios that host over 60 classes every week.

Your wellbeing

*Your wellbeing is of the utmost importance.
We have a range of services to support your wellbeing
throughout your time at Huddersfield.*

Wellbeing Services

Our Wellbeing Service supports students who have any worries, or just need someone to talk to. Here are some of the ways we can help:

- ◆ One-to-one appointments with dedicated advisers
- ◆ A comprehensive range of self-help resources
- ◆ 24/7 online support with Big White Wall
- ◆ Specialist advice and support in managing mental health
- ◆ Counselling services
- ◆ Support and guidance if you're falling behind with your studies
- ◆ Wellbeing events throughout the year
- ◆ Regular workshops and support groups.

The University Faith Centre

It doesn't matter what your beliefs are, everyone is welcome to come along to our Faith Centre. You'll get a warm welcome and have the chance to chat in our large community lounge. There are rooms for worship, meditation and prayer as well as ablution facilities.

Find out more at hud.ac/faith

The University Health Centre

Healthy body, healthy mind. Exactly what you want when you're studying. One of the first things you'll need to do when you arrive at University is register with an NHS general practice. The University Health Centre is right next door to the University, so if you decide to live within three miles of the campus it could be ideal for you.

The centre houses doctors and nurses who can provide advice on everything including sports injuries, rehabilitation, travel vaccines, your mental health, relaxation and stress.

Disability support

Nothing should stop you achieving what you're capable of. If you ever need some support, we're here to help. We have a strong reputation for excellent support for our disabled students, and as an international student you will have access to the same high quality provision as students from the UK.

Disability Services provides confidential advice and guidance with a focus on you and the support you need. We can help with specific learning difficulties such as dyslexia, mental health issues, medical conditions, hearing or visual impairments, autistic spectrum conditions and physical disabilities.

Sport at Huddersfield

Sport can play a big part in your mental wellbeing. Team Hud is based in Student Central, and offers cutting-edge facilities which include an eight court sports hall, a fitness centre with Technogym Artis equipment, a strength and conditioning studio, a squash court and two fitness class studios hosting over 60 classes every week. Team Hud also provides a number of services including Body Composition testing, an Exercise Referral Scheme and weight loss programmes.

“The Wellbeing Service at the University is a very helpful resource for every student. Appointments can be made easily with them to suit your commitments, and they are very willing to help with any kind of concerns, it is a supportive and caring facility.”

Alysia Wu
Physiotherapy BSc(Hons)

Hong Kong

The Library

We like it when stuff just works and we're pretty sure you do too. We believe equipment and systems should be simple so everyone is able to use them.

It's why you'll have a single login for WiFi (which you can use anywhere on campus), an email account and all the software you'll need for your course.

You'll also have loads of storage for your work – on and off campus.

The Library

Our Library is pretty special. It contains over 1,200 study places and over 530 ultra-modern PCs and Macs. And there's a huge number of books and journal articles for you to make use of. Around 330,000 in print form and literally millions in digital format.

You'll be able to find information easily via our MyReading system that you can use whenever you want, wherever you want.

The Library is open seven days a week during term time and 24-hours a day for most of the year, plus our computer lab is open 24-hours a day all year round.

So what do our current students think of it all? Well, in the 2019 National Student Satisfaction (NSS) survey, their satisfaction with the Library was above average when compared to other universities. In fact, our students gave us a 92% satisfaction rating.

While you're here you'll be able to call on:

- ◆ Specialist subject librarians – real people, trained to help you find the information you need
- ◆ Over 150 laptops and Macbooks available for loan, 24-hours a day.

"The University of Huddersfield library caters to all students as there are a range of books and study spaces. My favourite area is the Scholars' Rest, a space that offers a more flexible study environment where I get to bask in the natural light and study and socialise with my friends."

A unique heritage archive

What's the shape of archives to come? We reckon it's curvy. Our 'Big Curvy Screen' is a dynamic interface that lets you plunge into a fascinating collection of historic material. Just wave your hand and you'll be immersed in surround-sound material and be able to browse through our collections on a seven-metre-long wall.

The 'Big Curvy Screen' is just one part of Heritage Quay, our purpose-built archive. You'll find a huge collection of artefacts on art and design, music, theatre, politics, sport and education.

You can get involved as much as you want. Perhaps just find out about something you're interested in, or get creative and mix it up with your coursework.

Search our archives and find out about events at heritagequay.org

Excellence Award
 Our Customer Service Excellence Award recognises the exceptional service we offer you. From academic librarians to IT support, everyone is here to help.

CUSTOMER SERVICE EXCELLENCE

Specialist student support

Our international team is committed to giving you the highest level of support to ensure you get the best out of your studies.

Immigration advice

The Immigration Service is based within the International Office. The team provides immigration advice and support to non-EU international students. We run regular drop-in sessions and offer face-to-face appointments.

We also provide email support if you can't access our service in person. Our trained immigration advisers are experienced in guiding international students from all nationalities through the application process for Tier 4 and other study related visas. We also offer general immigration advice and are committed to providing a high quality service so that your immigration queries can be resolved quickly, allowing you to focus on your studies.

International Learning Development

The International Learning Development (ILD) team work to help international Business School students engage with their studies and achieve their full academic potential. The ILD team provide a range of free support programmes for all non-EU undergraduate and taught postgraduate Business School students. Students are timetabled for a weekly ILD class in which the tutor will help them to adapt to studying at the University of Huddersfield, understand what their lecturers expect from them and apply their learning to assignments.

In these sessions the ILD team will support students to:

- ◆ Understand and structure their assignments and dissertation the best way to get the highest grades possible
- ◆ Understand and use the University's systems to search for information and data for their assignments
- ◆ Use information from their research effectively and safely in their assignments
- ◆ Develop the confidence to speak in groups, seminars and presentations
- ◆ Develop ways of showing their critical thinking and analysis in assignments
- ◆ Revise for exams and learn techniques for greater exam confidence.

Throughout the year the team also help students to:

- ◆ Improve their academic language and written communication
- ◆ Adapt culturally to a different study and living environment
- ◆ Find their way to the resources and people they need
- ◆ Communicate with teaching and administration staff
- ◆ Find opportunities to make friends and improve their communication skills.

In addition, the team run the Bud in Hud programme, a regular opportunity for social and cultural activities. Voluntary workshops on various aspects of academic skills and intercultural effectiveness are also available throughout the year.

The Students' Union

To put it simply, Huddersfield Students' Union is a charity based on campus, led by students for students, which exists to make student life better.

Although we work closely with the University, we're a completely independent organisation, and this means we're 100% focused on your interests, concerns and wellbeing.

Whatever takes your fancy – whether it's joining a sports club or society, running a life-changing campaign, volunteering in the local community or just having fun at some of our amazing events – we're here all year long for students at the University of Huddersfield.

Take a break

Life's all about people. Come along to the Students' Union and you'll be able to connect with friends from a wide range of backgrounds and countries, studying all kinds of subjects. There are comfy sofas, WiFi, extra computers, games consoles and more! You'll find us on floor five of Student Central along with our letting agency Hudlets, student media spaces and our dedicated Advice Centre. We also have a handy SU shop.

Get involved

Everyone is passionate about something, even if you've not quite discovered what that is yet. With around 100 sports clubs, societies and academic societies to choose from, including American Football, Cricket, Childhood Studies, Enterprise and Salsa, there really is something for everyone! All of our activity groups are great for meeting people and becoming part of a community – you can even start your own club that doesn't exist yet as soon as you enrol!

BAME Ambassadors (Black, Asian, Minority Ethnic)

We're proud to have a large number of international students here at Huddersfield but we know that not all curricula are representative of the student body. That's where our award-winning BAME Ambassador programme comes in, working with the University to make changes to the curriculum and campaigning on current issues. If you want to help make change, you can get involved when you enrol, just come and talk to us.

Free advice and support

University life can sometimes come with challenges that are difficult to face by yourself. Our Advice Centre offers free, impartial and confidential advice on matters that can affect any student. Whether it's general welfare, finances, academic issues or housing information, our team of experienced and friendly advisers handle your concerns professionally. We also offer services such as a free-to-use phone and more.

Stand out from the crowd

Studies are just as important as having a good time, that's why we offer training and volunteering activities throughout the academic year to help you build a stand-out CV. We also co-ordinate the University's Academic Representative scheme; these students are here to be your voice when it comes to study troubles (so don't be shy!) and you can easily become an Academic Representative yourself to help make changes for your course mates.

Run by students, for students

We're run by a team of Student Officers who are elected by you, our members. Elections are held every year to decide our Officer team who are on hand to meet your every need, including; representation, sports, activities, wellbeing and equality. As a student at the University you could even run in the elections yourself!

The Students' Union

Mark your calendars

Throughout the year, the Students' Union hosts a series of headline events such as HudLive, Bonfire Night, the Christmas Fair, Varsity and more. Look out for our 'Give It a Go' programme. These are (often free) events, trips and sessions to help you get the most out of your time at Huddersfield. In the past we've taken our students to Paris, Amsterdam and Dublin for a fraction of the usual cost, and hosted amazing days out at Blackpool Pleasure Beach, Chester Zoo and the Harry Potter tour at the Warner Bros. Studio.

For exploring closer to home, we've launched an interactive map so students can easily find new things to do in and around Huddersfield. Find out more at www.huddersfield.su/discover

Accommodation

Storthes Hall Park

At Storthes Hall Park we're more than just a place to sleep, we offer a student experience like no other. With over 1,300 students on-site, a fun and diverse events programme, fantastic on-site facilities and a friendly and dedicated site-team, one thing is for sure – you'll have a great time living with us!

All our rooms are en-suite which means you'll get your own bathroom and there's a whole range of different rooms to suit your needs and budget.

There are up to eight students in each flat so meeting people and making new friends is really easy. You can live with people of the same sex or mixed, people in the same year or even on the same course!

Storthes Hall Park is based in the beautiful West Yorkshire countryside and there are plenty of nearby woods and trails to explore. Our students get a free gym membership for our on-site gym and access to over 10 events per week. It really is a home away from home. At DIGS our experience is unrivalled. We hold our own mini Welcome Festival to encourage students to get out and meet people. We also have 10 Block Representatives on site whose key role is to act as a friendly face for students. We encourage an active lifestyle which is why we offer free fitness classes from Zumba to Rounders to Bootcamp. If that wasn't enough we encourage our students to explore the UK and offer free monthly trips to get students out and about on a budget!

Storthes Hall Park facilities:

- ◆ The Venue – a bar with student discount, games rooms, cinema room and more
- ◆ 24-hour study space
- ◆ 24-hour gym
- ◆ Laundrette
- ◆ On-site shop
- ◆ ATM with free cash withdrawals
- ◆ 100mb WiFi and broadband
- ◆ 24-hour on-site team and CCTV
- ◆ Dedicated and regular bus service to University
- ◆ Car parking and bike storage
- ◆ Kitchen options to suit your preferred living style
- ◆ Online maintenance portal.

Student life:

- ◆ The largest student community in Huddersfield
- ◆ Welcome Festival and events
- ◆ Over 40 nationalities living with us
- ◆ Over 7 student societies chosen by students for students
- ◆ 10 Block Representatives to help students settle in
- ◆ Elected student council
- ◆ Over 50 jobs available
- ◆ Over 10 events per week including quiz night, movie night and football
- ◆ Seasonal events
- ◆ Free monthly trips
- ◆ Block v block competitions
- ◆ Dedicated Welfare Officer on-site
- ◆ Green living
- ◆ Volunteering and fundraising opportunities
- ◆ DIGDEEP wellbeing programme.

Accommodation

Ashenhurst Houses

If you're looking for house style living with no fuss then Ashenhurst Houses is the place for you. There are a total of 280 bedrooms making it small enough to see a friendly face but large enough to make new friends.

Each house has a shared kitchen and bathroom but you'll get your own bedroom. You'll be sharing the communal facilities with up to eight people so it's a lot like sharing a house except the bills are all included in the rent you pay – so no fussing/splitting bills.

If you live at Ashenhurst Houses you'll still have access to the DIGS experience and will have access to all the events and facilities at Storthes Hall Park. Ashenhurst Houses is just a short walk away from the University and town centre and you can get an annual bus pass for just £40*. You'll get unlimited travel during University hours.

Ashenhurst Houses facilities:

- ◆ CCTV
- ◆ On-site Block Representative
- ◆ Laundrette
- ◆ 100mb WiFi and broadband
- ◆ Close to public bus stop
- ◆ Close to supermarket and shops
- ◆ Access to events and facilities at Storthes Hall Park.

*Prices vary year on year.

Want to find your own accommodation?

Huddersfield and its surrounding areas offer some great alternative accommodation so you can find a place that’s just right for you.

In addition to our preferred, recommended and approved supplier of student accommodation there are a number of options for students in Huddersfield, as listed on the Huddersfield Students’ Union webpages. These include halls operated by iQ Student Accommodation (Aspley House, Little Aspley House and Castings House) and Unite Students (Saw Mill, Snow Island and Firth Point).

If you would like to find out more please visit the Huddersfield Students’ Union website for details www.huddersfield.su

Pre-Sessional English Programmes

We offer a fantastic range of Pre-Sessional English Programmes if English is not your first language. The courses have been specially designed to develop your English and study skills so that you achieve your full potential in your studies at Huddersfield and your future career.

On our Pre-Sessional English Programmes you can:

- ◆ Meet the English language requirements for your chosen degree course without re-taking IELTS at the end of the programme
- ◆ Expand your English language and confidence in order to maximise your study experience
- ◆ Build the critical and analytical skills demanded by UK Higher Education
- ◆ Adapt to your new home and surroundings so you can be prepared at the start of your degree
- ◆ Have full access to the University's facilities including the library, computers and sports centre.

Length	Cost (GBP)
4 weeks	£1,200
6 weeks	£1,800
8 weeks	£2,400
1 term	£3,600
2 terms	£7,200

“This programme gave me the confidence and ability to communicate better with people. As a result of completing the course, my listening and speaking skills have become much stronger and my performance in the classroom has improved.”

China

International Study Centre

The International Study Centre (ISC) offers English language and academic preparation for international students who do not currently meet the University's direct entry requirements.

ISC students are made to feel a part of the University community from the day they arrive in Huddersfield. The centre is situated at the heart of the Huddersfield town centre campus where ISC students can enjoy the same facilities and accommodation as other students at the University. On successful completion of your preparation programme you will progress automatically onto your chosen degree course without having to apply again.

Programmes available

International Foundation Year

The International Foundation Year (IFY) is a specially designed programme that provides a direct path to undergraduate degree study at the University of Huddersfield. The programme allows you to progress to a variety of degrees at the University.

There are four routes available:

- ◆ Art, Media and Architecture
- ◆ Business, Management and Law
- ◆ Engineering, Computing and Science
- ◆ Health and Human Sciences.

International Year One

The International Year One (IY1) is an advanced course of study equivalent to the first year of an undergraduate degree. The course has been carefully designed for students who are overqualified for a Foundation Year but underqualified for direct entry to the first year of an undergraduate degree.

Successful completion of the programme guarantees you direct entry to the second year of your chosen undergraduate degree.

There are two routes available:

- ◆ Business, Management and Marketing
- ◆ Engineering and Computer Science.

Pre-Master's Programme

The Pre-Master's Programme (PMP) is a 12-week programme that will provide you with the necessary English language and study skills to succeed in a range of business-related postgraduate degrees at the University.

A strong emphasis is placed on the British postgraduate educational system and the requirement for independent study.

There is one route available:

- ◆ Business, Management and Marketing.

Improve your English

English Language Preparation

If you require additional language training before you start your International Foundation Year, you can join the English Language Preparation programme.

There are two English Language Preparation options for entry to the International Foundation Year:

- ◆ 12-week English Language Preparation: Academic IELTS for UKVI of 4.0 (4.0 in all components)
- ◆ 24-week English Language Preparation: Academic IELTS for UKVI of 3.5 (3.5 in all components).

Pre-Sessional English

International Year One and Pre-Master's Programme students can join a Pre-Sessional English programme.

International Year One/Pre-Master's

- ◆ 8-week Pre-Sessional English Programme: Academic IELTS for UKVI of 5.0 (with 5.0 in all components)
- ◆ 12-week Pre-Sessional English Programme: Academic IELTS for UKVI of 4.5 (with 4.5 in all components).

Further information

For full details about any of these programmes, or to apply online, visit huddersfieldisc.com or call **+44 (0)1273 339339**

“The International Study Centre is the perfect place to bridge the gap between your education system and the UK system. It teaches you the language, knowledge and methods you need to be successful in your studies.”

ISC programme: International Year One in Business Management

Egypt

Undergraduate study

An undergraduate degree from the University of Huddersfield could help you take your first steps into an exciting career. You can choose to study a subject that you are interested in from a wide variety of degrees.

Most of our courses offer placement years, giving you the chance to get out in the real world and experience employment while you're still studying. Classes take place during the daytime and, for some courses, in the evening.

Bachelor's degree

A full-time Bachelor's degree normally takes three years. Lots of our degrees also give you the chance to take a placement or 'sandwich' year to build up your work experience. That would mean that your course would usually take four years in total. Upon successful completion, you'll achieve a qualification title:

- ◆ Bachelor of Arts – BA(Hons)
- ◆ Bachelor of Engineering – BEng(Hons)
- ◆ Bachelor of Law – LLB
- ◆ Bachelor of Music – BMus(Hons)
- ◆ Bachelor of Science – BSc(Hons)

Top-up

If you've already got a Foundation degree or a qualification like an HND, then a Top-up course gives you the chance to build on that and study for a full Honours level degree. It takes just a year full-time and it is subject to you meeting the entry criteria.

Integrated Master's degree

An Integrated Master's degree gives you the opportunity to combine undergraduate and postgraduate study for some courses. Courses last four years, or five years if you spend a year on a placement. The first two years are normally the same as the equivalent BSc or BEng course.

You'll be expected to do well in your first two years and then move on to specialise in subject areas that particularly interest you. At the end of the course you'll earn a Master's level degree.

We offer a range to choose from:

- ◆ Master of Engineering – MEng
- ◆ Master of Chemistry – MChem
- ◆ Master of Computing – MComp
- ◆ Master of Science – MSci
- ◆ Master of Pharmacy – MPharm

Postgraduate study

Whether you're looking to continue on from undergraduate level studies or build up specialist knowledge and new skills, we offer a whole range of postgraduate programmes to ensure you achieve your goals.

As part of our vibrant postgraduate community you'll have plenty of opportunity to network and build friendships.

Taught degrees

On a taught postgraduate degree, you'll learn through a combination of lectures, seminars and practical work.

Studying at Master's level will involve completing advanced specialist study in a particular subject or profession and usually contains a taught element as well as a supervised dissertation or research project.

Research degrees

On a postgraduate research degree, you'll work independently on a research topic of your own choice. You'll be assigned a minimum of one main supervisor, who'll be engaged in research in the relevant discipline(s) to ensure that the direction and monitoring of your progress is informed by up-to-date knowledge and developments. You'll also receive support from skills tutors and support groups.

Our research projects database enables you to search our research degrees and find specific research projects associated with that degree.

Discover more at research.hud.ac.uk

Fitting studies around you

Most of our taught postgraduate degrees and all of our research degrees can be studied full-time or part-time and some courses offer distance learning. You can also consider undertaking a Postgraduate Certificate or Diploma; these qualifications are steps toward a Master's degree, are internationally recognised and can be built upon in the future.

If you require a Tier 4 visa to study in the UK you will not be able to study part-time with this visa. However, if you have another type of visa that permits study in the UK, part-time study may be possible for you.

Professional Practice route

Some postgraduate degrees also offer the opportunity to undertake an additional 6-month placement at the end of the 12-month programme. This 'Professional Practice' route enables students with limited experience to put the skills and techniques developed throughout the Master's degree into practice.

Research at Huddersfield

Join us and you'll be part of a collaborative research community of 5,200 taught students and researchers from nearly 100 different countries, working alongside world-leading research teams, focused on delivering the highest quality research outputs.

At Huddersfield we advance research, innovation and collaboration across all of our academic departments through more than 70 research institutes and centres.

Finding a supervisor

To give you the best chance of acceptance onto your chosen research degree, we strongly recommend that you contact potential supervisors to discuss how your research interests may be compatible with their own interests and experience. You can do this by looking at our research institutes and centres at research.hud.ac.uk

If distance is an issue, you can arrange a meeting or a telephone conversation with potential supervisors to discuss your proposed research topic.

“The best part about studying at Huddersfield is the support you get from staff and fellow researchers. The research community at Huddersfield provides a lot of training that has helped improve and diversify my skill set and the newly formed Postgraduate Research Society has been a great way to unwind and meet new researchers from different fields.”

Here to support you

Support in your School

The University of Huddersfield offers postgraduate researchers discipline specific support and training, administrative support and opportunities to be part of the research culture.

The Graduate School

Professor Nigel King
Dean of the Graduate School

“Our Graduate School supports your academic and professional development as part of our research community. It offers a wide range of services, including research skills development, academic English Language, career and professional development services and advice relating to researcher development funding opportunities.”

Dr Anna Seabourne
Head of Researcher Environment

Dr Anna Seabourne and the Researcher Environment Team provide practical advice and support to researchers to develop the skills that will help enhance their work here at Huddersfield. They have the experience and knowledge to advise on matters such as research integrity and ethics, building working relationships with academic supervisors, training on new software, planning for a future career and much more.

Academic English Support

Dr Tatyana Karpenko Seccombe
Senior Lecturer in Academic English

“All international postgraduate researchers can benefit from academic English support in order to reach their full academic potential. The Academic English Centre provides support in a variety of forms, including small group courses and workshops on academic writing, academic speaking classes, one-to-one tutorials and drop-in sessions.”

Postgraduate Research Conference

Organised by current postgraduate researchers, this annual conference provides the opportunity to present your work to a multidisciplinary audience, resulting in constructive feedback, peer support and networking opportunities.

Tier 4 Doctorate Extension Scheme

This scheme is designed to allow full-time Tier 4 postgraduate researchers who complete a PhD or other Doctorate, up to 12 months' additional time in the UK to gain further experience in their chosen field, seek skilled work or develop a plan to set up as an entrepreneur.

Research at Huddersfield

Our research changes lives. We're committed to solving the problems and answering the questions posed by industry, science and society as a whole. Join our inspiring research community to make your mark on the world we live in. Here are four ways our international researchers are making a difference.

Ground-breaking cancer research

Dr Nikolaos Georgopoulos, a specialist in cancer research, and his team are the first to arrive at a deep understanding of a molecule that destroys cancerous tumours without harming healthy cell tissue. The team has developed and patented a cancer treatment regime that exploits the unique properties of the molecule allowing for highly effective new cancer treatments that are free of serious side effects.

Dr Nik Georgopoulos

Modernising China's villages

Research by Professor Adrian Pitts and Dr Yun Gao is helping to modernise villages in China while preserving the important traditions of rural life. The Sustainable and Creative Village Research Network aims to support village modernisation in a sustainable way. It is helping to promote heritage skills in rural areas, improve living standards and generate better economic prospects for rural residents.

Modernising villages in China

Devastation from tsunami

Disaster early warning system

An estimated 270,000 people in the region of the Indian Ocean died as a result of the undersea earthquake that struck off the northern tip of Sumatra in Indonesia on 26 December 2004. Countries around the Indian Ocean are benefitting from the experience and advice of Professors Dilanthi Amarunga and Richard Haigh on how they best prepare to cope with a future, potentially disastrous, tsunami.

Arctic researcher Dr Phil Hwang

Exploring climate change in the Arctic

Geophysicist Dr Phil Hwang is an accomplished Arctic researcher who has already made 15 voyages to the Arctic region and he is now taking part in MOSAiC, the largest Arctic research expedition yet planned. This valuable research is helping to address the global issue of climate change.

You need to know...

95%

In the undergraduate subject area of Economics we scored 95% for overall satisfaction.*

Our Accounting, Finance and Economics courses open up a world of possibilities. It's not just about the figures on paper, but about how things happen in the real world. If you've got a head for problem solving, this subject area will offer a rewarding path to a great career.

Accounting, Finance and Economics courses require a dynamic learning environment and the ability to learn from experts in the field. Our staff have a wealth of professional and industry experience.

We offer a well-balanced combination of theory and practice with a strong focus on teamwork, analytical thinking and analysis of business situations.

By providing practical project experience, team working opportunities and specialist knowledge of your chosen pathway, we aim to help develop your ability to work collaboratively and put theory into practice.

Partners

Our *Partners in Accountancy* scheme provides access to a well established network of specialists, from finance and economics organisations, all of which contribute to classroom learning.

These courses are supported by our state-of-the-art Trading Room, equipped with Bloomberg Professional software, providing up-to-date market demand data and financial analysis tools to give you a feel for how investment decisions are made in industry.

Our postgraduate degrees also offer the opportunity to undertake an additional 6-month placement at the end of the 12-month programme. This 'Professional Practice' route enables students with limited experience to put the skills and techniques developed throughout the Master's degree into practice.

The global demand for qualified professionals has never been higher, nor the work in these industries more varied. Throughout our courses we aim to provide you with the required knowledge, skills and experience you'll need to get you industry ready and prepared to capitalise on the future prospects as a Huddersfield Business School graduate.

Accreditations

Our courses are accredited by professional bodies such as RIBA, CIOB, ARB, CABE and CIAT.

We have a long history of architectural education, since the School of Architecture was first established by Norman Culley in 1921.

Our courses focus on cutting-edge design practice and address some of the latest challenges and opportunities for our industries, including sustainability, user centred design, building information modelling and lean construction. Our international and industry-led focus provides students with opportunities to really broaden their perspectives and understand the need to deliver innovative solutions that satisfy the physical, cultural and social conditions wherever development is required.

Our courses are fully accredited by professional bodies such as the Architects Registration Board (ARB), the Royal Institute for British Architects (RIBA) Part 1, Part 2 and Part 3, the Chartered Institute of Architectural Technologists (CIAT) and the Chartered Association of Building Engineers (CABE). The University has Chartered Institute of Building (CIOB) Accredited Centre Status.

Top 20 in the UK

We are in the Top 20 Universities in the UK for Architecture.*

Our enterprising graduates are well represented at the top of the architecture, design and built environment professions, both nationally and internationally.

We have built a new home for the study of Art, Design and Architecture at the University. The Barbara Hepworth Building, named after the famous West Yorkshire-born sculptor, has its main frontage overlooking the picturesque Huddersfield Narrow Canal that runs through the heart of the University's campus.

Our vision: Excellence in teaching and research in architecture, design and the built environment, playing a leading role through investigation, creativity and innovation.

The following core values are central to this vision: nurturing critical thinking and practice through a student centred learning environment with inspirational staff, industry focused and practice-led approach, trust and commitment creating lasting relationships.

*The Guardian University League Tables 2019.

"I personally feel that the University of Huddersfield is one of the top universities in construction management in the UK. We have had lots of guest lectures and company visits, which provided us with more information in the construction industry."

The new £30 million Barbara Hepworth Building brings together our Art, Design and Architecture courses under one roof.

Facilities

Our new Barbara Hepworth Building offers a revolutionary, unique and state-of-the-art virtual reality and visualisation lab.

Art and Design builds on the potential for contemporary, experimental, commercial and transdisciplinary practices. We are committed to promoting high quality learning which reflects contemporary knowledge and understanding related to studio practice, theoretical contexts and forms of public display and industry.

Our focus on interdisciplinarity encourages a greater range of transferable skills for employment within a diverse world of art, design and culture.

We have a reputation for stimulating progressive art and design practice combined with promoting live exposure and exchange with national and global creative industries.

As a student, you'll be encouraged to test the boundaries of your own practice. Our courses focus on the cultural and creative industries, providing you with further insights into commercial and entrepreneurial opportunities within this sector.

This can involve multidisciplinary exchanges with other students, working with live briefs, and/or developing research-focused outcomes in Art and Design.

We welcome you to a vibrant culture of learning through guest speaker visits from industry, research centre projects and events, exhibitions, conferences and workshops. Past guest speakers have included the BBC, Coca Cola, Ministry of Sound and PlayStation.

"I came to the University of Huddersfield to study photography. I remember opening the door and walking into my first lecture in my first year. My lecturer welcomed me warmly, telling me that if I ever had any questions in future they would do their best to help. I felt really moved. In the days to come, the lecturers did their best to guide me and help me."

Accreditation

Our Biological Sciences courses with a one-year Research Placement have Advanced Accreditation from the Royal Society of Biology.

92%

In the undergraduate subject areas of Molecular Biology, Biophysics and Biochemistry we scored 92% for student satisfaction.*

It's vast, it's fascinating and it's about every single living thing on the planet. Subjects don't come much more fundamental than Biological Sciences.

We are talking about the study of life and living organisms including their structure, function, growth, origin, evolution, distribution and taxonomy. From the growth and division of simple bacteria through to the evolution, development, growth and adaptation of complex multi-cellular organisms, and the emerging role of genomics in personalised medicine and biodiversity in a changing world.

On our Biological Sciences degrees, you'll have the opportunity to study core topics and consider contemporary issues in all major aspects of biology. Optional choices in each year of your course provide you with the opportunity to specialise further in core areas of molecular cell biology, organismal biology, and ecology and environmental biology.

Alternatively, you can vary your choice of optional modules to keep your coverage of the biological sciences broad.

All the while, your learning will be supported by doctoral-level academics with expertise or active research interests in diverse areas of biology and genetics, including cancer pharmacology, ancient and modern patterns of human migration, environmental and evolutionary microbiology, novel antimicrobials, and the cell biology of human disease. Throughout the course you'll receive hands-on practical training in the laboratory using modern equipment, developing the skills and interests that help to prepare you for a research dissertation in the final year. As a further boost for your CV and employment prospects there's also the opportunity of a placement year in industry or research in the third year of the course.

As a student on the course you may also want to become a student affiliate member of the The Royal Society of Biology.

*National Student Survey 2019.

"I enjoy my course because it gives me a taste of the crucial aspects in human biology and pharmacology that I can possibly follow career-wise. I chose this course also because of the option of a research placement which encouraged self-confidence and independence in core techniques applied in medical research."

You need to know...

Placements

All our undergraduate courses offer you the opportunity to undertake a work placement both nationally and internationally supported by our award-winning Employability and Placements Team.

Our Business and Management courses are designed to help you develop the skills you need for a career in business, through a combination of theory and practice to inspire people in today's dynamic business environment.

Business and Management courses are designed to equip you with a broad overview of the commercial world where you will be introduced to the financial, legal, ethical, social and economic issues and their impact on the dynamic business environment. Topics within the subject area include links with International Business, Business Management, Leadership, Human Resource Management and Business Administration.

CMI

We are an official partner of the only chartered professional body in the UK dedicated to management and leadership, the Chartered Management Institute (CMI).

By providing practical project experience, team-working opportunities and specialist knowledge, our courses help you to develop your ability to work collaboratively and apply theory to real-life situations. Whether you specialise in finance, economics or business, you will develop an in-depth knowledge through a combination of research, practical experience and shared academic and industry knowledge.

Our postgraduate degrees also offer the opportunity to undertake an additional 6-month placement at the end of the 12-month programme. This 'Professional Practice' route enables students with limited experience to put the skills and techniques developed throughout the Master's degree into practice.

We also offer a Master of Business Administration (MBA) programme that is designed to provide applied management education, and is a globally recognised postgraduate management qualification that is highly valued by employers.

"As a research student at Huddersfield, I work with like-minded academics to discover and create new knowledge for the benefit of society. My research seeks to drive innovation and deliver real-world impact, integrating the technological perspective with insights from the economic and social sciences."

Career prospects

81% of our Chemistry undergraduate graduates go on to work and/or further study within six months of graduating.**

From fuel and clothing to pharmaceuticals and phones, chemistry is the central science that makes our modern everyday lives possible. Chemical Engineering delves into how chemical reactions can be scaled up for industrial manufacturing.

Our undergraduate courses have been designed to develop skills and knowledge that will be invaluable for employment in industry or for taking the next step on your academic journey. You may have already begun to specialise in key areas of chemistry. At Huddersfield you'll be able to develop your interests, with a choice of degrees across mainstream chemistry, chemical engineering and pharmaceutical chemistry. This could be the vital first step into a career in an industry such as agrochemicals, cosmetics, environmental science, sustainable technology, metallurgy, petrochemicals or adhesives.

Our Chemical Engineering BEng(Hons) course is accredited by the Institution of Chemical Engineers (IChemE). Our Chemistry degrees are accredited by the Royal Society of Chemistry (RSC).

For the postgraduate courses, analysis is the cornerstone of many physical sciences and is widely used in both academia and industry.

Analytical science can be applied to areas ranging from testing the safety of medicines in the health sector, monitoring pollutants in the environment through to quality control in manufacturing.

These courses provide theoretical and practical skills in a wide range of analytical techniques with the option to specialise in applications in the areas of chemistry, biology or pharmaceutical science.

Product Innovation with Textiles MSc offers a holistic approach, providing you with a strong grounding in textile properties, business and marketing in order to inspire and guide your textile product innovations.

**Permanent staff, after probation: some recently appointed colleagues will only obtain recognition in the months after their arrival in Huddersfield, once they have started teaching.*

***The Guardian University League Tables 2020.*

"I chose Pharmaceutical Chemistry because of the mixture of chemistry, biology and pharmacology. The course has helped me learn about medicines and their effect on the body, as well as develop laboratory and professional skills, all of which I will be able to take forward into my future career."

£24,500

The average Computer Science graduate salary in the UK is £24,500.*

The world of work is changing, and now more than ever technological advances including computers and both hardware and software, have been key to this change. With the number of highly skilled jobs opportunities increasing, there has never been a better time to study Computing.

At Master's level of study, you can improve your technical management skills as well as challenge your approach to complex situations through practical project experience and team-working opportunities.

Specialist knowledge of your chosen discipline will help develop your ability to work collaboratively and benefit your IT career in industry and commerce, or even in academic research.

Our suite of undergraduate courses focus on programming and encompass the design, development and support of computer software; whilst our information technology (IT) courses address the design, implementation and maintenance of information technologies to meet the needs of individuals and business.

All of the undergraduate degrees available include an optional year in industry. Our Placement Unit aims to support you in finding suitable employment in order for you to gain valuable experience.

Some of our Master's courses offer a 6-month placement where you can undertake a period of development through study or by working with a company, research group or within a teaching environment in the UK or overseas.

Computing at Huddersfield has a 92% record of graduates from undergraduate degrees finding employment or going on to further study within six months of graduation.**

Global

Our staff collaborate with colleagues across the globe in their work on psychophysical performance and mindfulness practice.

97%

In the undergraduate subject area of Drama, Theatre and Performance we scored 97% for student satisfaction.**

Our undergraduate courses in Drama, Theatre and Performance combine theory and practice with plenty of opportunity to perform, direct and create high-quality productions, in a dynamic, creative and well-resourced environment. Our research community places practice at the heart of its approach, and offers you the opportunity to explore different specialist areas.

Our flexible courses enable you to study a wide range of subjects, from contemporary drama theory to historical performance practice. You'll explore drama from every angle, whether you're interested in acting, directing, stage management, technical theatre or writing.

All our tutors have worked professionally, so they understand the pressures and challenges of the world you want to go into. They also know what employers are looking for. You'll have the chance to work with professional theatre companies and practitioners and get involved in research seminars, conferences and public workshops.

Our bespoke converted building houses state-of-the-art facilities, including three adaptable studios with sprung floors and the latest multimedia projection equipment.

Many of our graduates have gone on to work in the performing arts sector, award-winning films, television, touring theatres, teaching and running their own performance companies. If you've got the talent and the determination, we'll help you to succeed whatever route you decide to take.

Drama, Theatre and Performance at Huddersfield also hosts a vibrant research culture which includes the Centre for Psychophysical Performance Research (CPPR), the Magic Research Group (MRG) and the Lines of Flight series. Each group publishes its own journal, organises seminars and showings of research practice, and collaborates on projects with colleagues from across the world. Our other specialist areas include research into performance and disability, psychoanalysis, creativity, ecology, improvisation, new writing and processes of devising. We work in a collaborative environment, offering you opportunities to take part in staff-led research projects.

98% for learning support

In the School of Education and Professional Development we scored 98% for the learning support offered to international students.*

100%

The UK's only University where all of our permanent teaching staff are Fellows of the Higher Education Academy.**

If you're looking to work alongside children, young people and adults to support their future development and engagement, then we offer a range of undergraduate and postgraduate options that could be your perfect choice.

We offer an exciting range of study options, with many providing routes into teaching, social work, and working with families and young people. All of our courses support you in developing the skills and understanding needed to work alongside others effectively. Our professional networks include links with schools, colleges, early years' settings, local authorities, youth services, young offending teams and career service organisations. These play a major role in developing course content through collaboration and guest lectures.

We aim to offer our students an excellent experience and develop them to be outstanding professionals, critical thinkers and active researchers. Most academic staff have very close working relationships with professionals in the field of Education and are engaged in a range of outreach activities. Most are prominent researchers and are actively involved in looking at new policies and development projects, which is fed directly back into course content and shared across our academic community.

Teacher training

If you aspire to become a teacher, at the University of Huddersfield we offer a range of teacher training courses. Whether you want to go into primary, secondary or lifelong learning (post-14), our courses can help you get the professional training and experience you need.

For detailed course information and to discover your teacher training options, please visit hud.ac/teach

Accreditation

Most of our courses are accredited by the Institution of Engineering and Technology (IET) and contribute towards satisfying the requirements for chartered engineer status.

£26,000

The average Engineering and Technology graduate salary in the UK is £26,000.*

Electronics and electrical systems are used extensively in everything from satellites to the automation of production lines, super computers and broadband. In fact, in this increasingly technological world, it's becoming more difficult to think of an area where electronics and electrical engineering aren't used. This is a fast moving growth area and highly talented engineers are in demand.

Our undergraduate and Master's degrees will provide you with an advanced knowledge of electronic and electrical engineering in your chosen specialism. They cover key areas relevant to UK, European and worldwide industries.

Our students get the chance to join student projects and competitions; Team HARE for example, design, build and race a single seat racing car in a UK national competition. Hud Rail build and race a locomotive in the IMechE's railway challenge, and Team Hawk's, Unmanned Aircraft Systems Challenge (UAS) combines all facets of electronic and electrical engineering into a high-performance drone.

All of our full-time undergraduate courses include an optional year in industry. Our Placement Unit aims to support you in finding suitable employment in order for you to gain valuable experience. Some of our Master's courses offer a 6-month placement where you can undertake a period of development through study or by working with a company, research group or within a teaching environment in the UK or overseas.

*Higher Education Statistics Agency 2017.

"I truly enjoy my course because there is ample opportunity to work hands-on in laboratories which helps a lot with learning about the functionality of motors and transformers. Lecturers are always readily available to ensure students are satisfied and succeeding with their learning."

English Language and Applied Linguistics MA

There are PhD and Master's by Research degrees available in this subject.

You need to know...

Real World

Department magazine, Babel, provides cutting-edge linguistics research and has hundreds of subscribers around the world.

Modern languages

Our Modern Languages Programme allows you to study a modern language outside your degree programme.

Are you fascinated by how language works and what people can do with it? Language is a uniquely human phenomenon with lots of intricate aspects to explore. At Huddersfield, we are well known for the applied focus of our research and we are proud of our reputation for quality in both teaching and research.

English Language and Linguistics degrees focus on language as a system and how humans use it in everyday life. From analysing conversation to examining child language acquisition, or examining forensic applications of language knowledge, our courses offer a wide range of modules. As a student with us, you will use state-of-the-art facilities such as our forensic linguistics lab, our research and resource centre and our conference labs. They're all fully equipped with the tools needed for specialist linguistics work. You can also get involved with our in-house popular linguistics magazine, Babel.

You can combine your studies in English Language or Linguistics with a number of other fields through our joint courses. Choosing English Literature allows you to look deeper into the effects of language as used in poetry, novels, sagas and plays. If you choose our Creative Writing route, you'll develop your own writing techniques and skills, crafting your work for publication. Our new courses with Politics, Sociology and Criminology allow you to examine how language is intimately connected with the formation and regulation of society, not to mention the ways in which language affects subcultures and those who live outside of society's usual boundaries.

Our range of taught postgraduate and supervised research degrees has been developed by academic staff who have attracted prestigious national and international grants and awards, or are working on research collaborations with national institutions and universities across the globe. Our vibrant research community regularly present at national and international conferences.

“Undertaking this course was one of the best decisions I’ve made. It gave me the opportunity and means to acquire knowledge on various aspects and uses of language and I enjoyed every bit of it. The modules are great, the tutors are passionate and supportive, and you get to make friends quickly.”

You need to know...

Real World

The University hosts the annual, award-winning, Huddersfield Literature Festival, where you can meet your favourite authors, showcase your talent or improve your skills.

Perhaps you love reading and you want to develop the skills that would make you stand out in the jobs market. You may even be a future novelist, just starting your journey and eager to learn techniques to enhance your chances of being published.

Our English Literature modules offer you the opportunity to study texts from the Renaissance to the 21st century, from poetry to drama. Working with our highly qualified and internationally recognised staff, you'll engage with cutting-edge approaches and scholarship.

In our Creative Writing modules you will focus on developing your own writing techniques and skills. Our Creative Writing staff have published widely, and their work is read and translated across the globe.

Literature Festival

The annual Huddersfield Literature Festival attracts authors such as Irvine Welsh ('Trainspotting'), Jodi Picoult, Ian Rankin ('Inspector Rebus') and Simon Armitage, the UK's Poet Laureate.

Whatever you're working on – be it poetry, a novel or a screenplay – we will give you the chance to develop your ideas, craft your work and get it ready for publication.

If you study one of our postgraduate research degrees then you will be supervised by academic staff who have attracted prestigious national and international grants and awards.

Huddersfield is a happening place for literature, so while you're here you will have the opportunity to get involved in the Huddersfield Literature Festival, or attend one of the talks, performances and visits that go on throughout the year. You could even publish your own work in our internationally distributed Grist collections.

“As a poet, I had heard of the Huddersfield Literature Festival and the creative writing degrees the university offers, and I wanted to be part of this dynamic community. I am quite convinced that this PhD will enhance my own practice, be an asset to secure a creative writing tutoring position and of course enable me to teach literature in various organisations.”

You need to know...

Barbara Hepworth Building

The new £30 million Barbara Hepworth Building was designed to create opportunities to work across disciplines, with a mix of studios, workshops and digital facilities across all floors.

The Fashion and Textiles department is at the cutting-edge of teaching, technology, innovation, and research.

In collaboration with staff, students are involved in the exchange of knowledge, skills, and expertise that form our core modules, projects, and enterprise activities.

The department is internationally-renowned for its excellence in craft skills, business, promotion, and marketing, and as a subject area we are entrepreneurial and proactive in engaging with industry. As a student here you will have a multitude of opportunities to engage with fashion and textile organisations ranging from global corporations to small craft businesses and specialist ateliers. Engaging with our industry partners will enrich your academic experience, enable your entry to professional networks and empower you to achieve your career ambitions.

We work hard to develop exciting live projects that range from design briefs with fashion and textile businesses to competitions with industry bodies.

Accreditation

Costume with Textiles, Fashion and Textile Buying Management, the Fashion Design suite and the Textile Practice suite are accredited by the Textile Institute.

We have instigated and hosted ground-breaking conferences that address areas such as textile innovation and creative pattern cutting. These events have attracted global delegates, giving them the opportunity to present their research and greatly enhancing the experience of our students.

We have built a new home for the study of Art, Design and Architecture at the University. The Barbara Hepworth Building, named after the famous West Yorkshire-born sculptor, has its main frontage overlooking the picturesque Huddersfield Narrow Canal that runs through the heart of the University's campus. As the centre of vibrant and dynamic creativity at the University, the Barbara Hepworth Building fosters intellectual and creative exchange between different disciplines and allows Fashion and Textile students to collaborate and forge new ideas with students of other courses.

Previous placements from this subject area include Dr Martens, Karl Lagerfeld, Paul Smith, and Anthropologie.

“My favorite memory of the University is probably just all of the time I spent in the construction workrooms. The energy in the room was always really upbeat and there was a great sense of community. There was a lot of frantic sewing, coming together to solve problems and just a lot of good times.”

Forensic Science (Forensic Toxicology) MSc

There are PhD and Master's by Research degrees available in this subject.

You need to know...

Accreditation

All our undergraduate Forensic Science courses are accredited either by the Chartered Society of Forensic Sciences or the Royal Society of Chemistry.

Want to delve into the kind of problem-solving science that provides evidence for the courts and legal system? Pave the way for a career in the fascinating field of forensic science with one of our accredited degrees.

A dedicated crime scene suite. Outdoor crime scenes. The chance to gain hands-on experience in modern laboratories using instruments such as scanning electron microscopy. Our courses give you the opportunity to delve into the exciting world of forensic science.

Whose is that second fingerprint? What did the victim have under their fingernails? As a forensic scientist you'll be applying science to help answer questions of interest to a court of law when considering criminal cases. You've got to be a great all-rounder to succeed.

95%

In the undergraduate subject area of Forensic and Archaeological Science we scored 95% of student satisfaction.*

That's why we start you off with a thorough grounding in all the fundamental sciences. We focus on both real-world forensic and industry analytical science. At the end of the course you won't just know your stuff, employers should know you know it too.

The career opportunities are hugely exciting. Reporting Officer, Crime Scene Examiner, Forensic Technician or Toxicology Analyst are just a few of the many roles you could go into, as well as opportunities in niche sectors like forensic anthropology or bloodstain pattern analysis. To make sure you are career ready, our teaching will offer you real life applications. We'll also give you the chance to get out into the real world so you can gain some invaluable experience as you go.

*National Student Survey 2019.

"I love working in a forensics lab evaluating trace evidence and poisons, sometimes presenting the findings in a report for a trial. I chose Forensic Science because each case is different; an opportunity for growth."

Placements

100% of our undergraduate students have the opportunity to undertake a placement year in industry.

The games and web industries are truly global and offer some dynamic and exciting job opportunities to fresh talent.

Perhaps you want to develop your programming skills, or you're looking to use your design talents to create design graphics for games and web. With such fast-moving industries, anything is possible.

Our courses combine the latest knowledge and thinking with real-world practicality to help you prepare for work. Technology and creativity go hand in hand. We'll give you the chance to take part in competitions, live projects and games jams.

Employability

The final year web courses Student Showcase is attended by industry representatives.

Our courses are geared towards the practical, but you can progress this even further by taking a year in industry. All of our full-time undergraduate courses include an optional year in industry which will provide you with the opportunity to gain valuable employment experience.

Or you could get the opportunity to work at the University's own Canalside Studios, producing work for commercial clients and developing games for a range of platforms. We also provide you with an opportunity to set up your own business, by taking the Enterprise Placement Year.*

We'll give you access to the systems used in the industry, including video and photographic equipment and cutting-edge software.

**Subject to visa regulations. See hud.ac.uk/international to find out more.*

"I chose to study web programming as I love coding and learning new programming languages. I have also found studying cyber security is a new challenge for me, which makes the course very interesting."

Undergraduate Degrees

Geography BSc(Hons)*

Human Geography BSc(Hons)*

Physical Geography BSc(Hons)*

*This course has an optional work placement year.

Postgraduate Degrees

There are PhD and Master's by Research degrees available in this subject.

You need to know...

100%
The UK's only University where all our permanent teaching staff are Fellows of the Higher Education Academy.*

Real-world experience
Field trips are embedded into all of our Geography degree courses.

Are you interested in understanding the physical world we inhabit and the social structures we have developed to occupy specific spaces? Do you want to make a valuable contribution to solving many of the problems facing contemporary society?

So how do we define geography? Well, it essentially deals with people living in a place, who exploit a specific space. Geographers not only help us to understand the physical world we inhabit, and the social structures we have developed to occupy specific spaces, they also make a valuable contribution to solving many of the problems facing society today.

If all this makes your world turn then our Geography degrees here at the University of Huddersfield could be the first vital step into a career in sectors such as central and local government, education, environmental consultancies, Geographic Information Systems (GIS) or the commercial sector.

Graduates can consider roles such as Cartographers, Data Analysts, Environmental Managers and Consultants, Planners, Policy Advisors, Quality Managers and Researchers.

At the University of Huddersfield we offer three different, but interrelated, degrees in geography that are underpinned by the principles of sustainability, particularly the concept of planetary boundaries.

Our Geography degrees aim to stimulate your curiosities and position you for a wide range of career choices. Depending on where your interests lie, there's Geography BSc(Hons), which combines elements of human and physical geography, Human Geography BSc(Hons), which focuses on how society has evolved to exploit spaces or Physical Geography BSc(Hons), which specialises in the physical world we inhabit.

*Permanent staff, after probation: some recently appointed colleagues will only obtain recognition in the months after their arrival in Huddersfield, once they have started teaching.

“Our Geography degrees will challenge you to investigate and debate many of the most important issues facing societies in the 21st Century. In doing this, you will develop the knowledge and applied skills required for a wide range of employment and postgraduate opportunities.”

Top 20 in the UK

We are in the Top 20 UK Universities for the Health Professions subject area.*

The health, social care and sport arenas are a truly rewarding place to work. We offer a range of courses for those who would like to pursue a new career, as well as those who wish to extend their knowledge and expertise in their current role.

We pride ourselves on the quality of our teaching, excellent facilities, innovative research and strong partnerships with our students, placement providers, employers and service users. Our lecturers have close links with the health, social care and sports sectors.

Whilst you are studying you will be able to use state-of-the-art equipment and purpose built simulation environments.

We have skills labs which replicate delivery suites, operating theatres, critical care wards and rooms in patients' homes, as well as physiotherapy practical rooms, sports science labs, nutrition labs and the University's health and fitness centre. This provides an opportunity for you to develop a feel for the environments you will be working in.

Many of our Health and Social Care courses offer eligibility to register with the Nursing and Midwifery Council (NMC) or the Health and Care Professions Council (HCPC). Our sports courses are endorsed by SkillsActive, providing the opportunity for you to study extra qualifications within your degree that are recognised and valued by the industry.

Our specialist courses address the changing health trends affecting countries worldwide and provide the opportunity for you to function at the leading edge of practice development and research.

*The Guardian University League Tables 2020.

“The Master of Public Health is a great course for those who wish to critically analyse all aspects of the public health arena. I have particularly enjoyed listening to and learning from the guest speakers who have first-hand experience working in this field of nursing, their lectures really help you to think about how you might be able to contribute out in the real world.”

You need to know...

Placements

All courses offer you the opportunity to undertake a work placement either nationally or internationally.

Here at Huddersfield you'll be able to engage with a range of approaches to history and work with primary source materials in dynamic and innovative ways. We have a long-standing reputation for internationally excellent research, investigating cutting-edge themes in global contexts.

We'll give you the chance to shape your studies to your interests, whether that's the medieval period, the Tudor era or modern world history. Our undergraduate modules are geographically diverse too, from Britain and Europe to North America and Asia.

Our courses allow you to build transferable skills, including analysis and communication. You'll learn how to put together a convincing argument, develop the self-discipline to work alone and the team skills to work with others. These skills will enable you to assess challenges and solve them through discussion whilst generating knowledge through your research.

£2m Archive

The Heritage Quay at the University of Huddersfield is an information, records management and archive service open to all students, academics and members of the public.

Supported by our work placement programme, our graduates have gone on to varied jobs at places such as The British Red Cross, The House of Commons or in the Civil Service, the Imperial War Museum, West Yorkshire Police, and in numerous archives, schools and colleges.

You might be surprised by just how creative our History courses are, with opportunities to design exhibitions or marketing pitches on historical topics. You'll also have the opportunity to dive into our innovative and award-winning archive at Heritage Quay.

Our research expertise ranges from medieval to modern, including topics such as the Crusades, gender in the medieval world, the Wars of the Roses, the impact of the Reformation, social and cultural responses to mental illness in the 20th Century, health and humanitarianism, histories of childhood, culture and society in wartime Britain and France, ideas of liberty and democracy in India and the scientific culture of Nazi Germany.

"I completed both my undergraduate and Master's by Research degrees in History at Huddersfield. They have developed my passion for the subject and made me feel sure that I want to pursue a career as a historian. I strongly recommend History at Huddersfield to anyone who is keen to become a historian."

Partners in Law

Our Partners in Law scheme links you with experienced legal practitioners from local, regional and national firms.

Law is a fascinating subject area. It requires analysis, logical and lateral thought, combined with precision and tenacity.

Whether you'd like to work as a legal advisor in an international corporation or defend someone against a miscarriage of justice, our law courses aim to provide you with in-depth knowledge of core legal concepts alongside an understanding of developments in the English and European legal system.

Accreditation

Our undergraduate courses are all recognised by the Solicitors Regulation Authority and the Bar Standards Board.*

You have the opportunity to build up your legal expertise and knowledge, and can expect to receive the highest standard of teaching, as many of our staff have a vast breadth of professional and industry experience.

Our courses enjoy close links to industry, offering additional networking, advice, mentoring and updates from the profession. Many of our Law graduates go on to work in areas including local government, banking and commerce.

**At the academic stage of training for solicitors and barristers respectively.*

“Since High School I became interested in the English legal system and decided that I’d like to explore this subject more, so I chose the Law LLB course here at Huddersfield. It’s a great pleasure to study in a place where everything around supports your development!”

Sustainable Supply Chain Management MSc ^{PP}

There are PhD and Master's by Research degrees available in this subject.

^{PP} This degree offers a 6-month placement via the 'Professional Practice' route.

You need to know...

Placements

Our undergraduate and postgraduate programmes offer the opportunity to undertake a placement and gain real-world experience.

Our Logistics, Transport and Supply Chain Management courses aim to give you a thorough understanding of the commercial activity of transporting goods to customers and passengers to their chosen destination.

Within a business context, it is now recognised that one of the main ways in which competitive advantage is gained, is through the effective and efficient management of the supply chain. This refers to the flow of products or services from their point of origin through to the final point of sale or use.

In today's globalised and digitalised business environment, managing operations, logistics and the supply chain faces a number of challenges. It is an essential function within organisations to ensure goods and services make it to their destinations across the globe.

Accreditation

Most of our undergraduate courses in this subject area are accredited by the Chartered Institute of Logistics and Transport (CILT).*

Within this subject area, you can learn the skills that ensure business operations run more efficiently and effectively, across a global market. Our postgraduate degrees also offer the opportunity to undertake an additional 6-month placement at the end of the 12-month programme. This 'Professional Practice' route enables students with limited experience to put the skills and techniques developed throughout the Master's degree into practice.

Our courses are structured around core subjects such as finance, economics, HR management, marketing and strategic management. You can choose from a number of courses covering key areas in this dynamic sector. Each one focuses on particular elements such as air transport, logistics and operations, sustainability, project management and supply chain strategy.

*Excluding Business Data Analytics BSc(Hons), Business Supply Chain Management BA(Hons) and Supply Chain Management with Logistics (Top-up) BSc(Hons).

"I felt that Huddersfield offered the best logistics course, and once I had spoken to lecturers it was clear to me that it would be my first choice. It was surprising how easy it is to fit in and find new friends. When I moved to Huddersfield I knew absolutely nobody, but within weeks I met a lot of people who I am still friends with now."

Undergraduate Degrees

Mathematics BSc(Hons)

Online at courses.hud.ac.uk

This course has an optional placement year.

You need to know...

£25,000

The average Mathematical Science graduate salary in the UK is £25,000.*

Placements

We encourage all our students to undertake a placement year in industry with support from our dedicated Placement Unit.

A degree in Mathematics opens the door to a wide range of interesting and exciting careers. Mathematicians' ability to reason logically, to develop quantitative models and to extract information from data means their skillset is valued everywhere.

Mathematicians are needed in the aerospace, social media, pharmaceutical, finance and electronics industries - to name just a few of the sectors eager to employ mathematically qualified graduates.

The Huddersfield degree focuses on the mathematics you'll need to solve real world problems using mathematical modelling, statistics and computing. We look at calculus from the basics and underlying theory all the way through to the partial differential equations used to model flowing water and financial instruments.

Statistics is covered from basic probability to the frontiers of Big Data. We also include a healthy dose of numerical computing so you are able to use mathematical software and write programs making use of the techniques you've learned.

As well as the technical skills needed, we also offer modules where you work in groups to solve real world problems. This allows you to develop experience in project management and teamwork skills. More importantly it introduces you to the creative side of mathematics, developing new models and new techniques and explaining what you've done to a non-technical audience.

After your second year you'll have the opportunity to take a placement year, putting into practice the techniques you've learnt. Our dedicated Placement Unit has links with companies in the UK, Europe and beyond.

*Higher Education Statistics Agency 2017.

"As with many academics I love the "aha" moment when a student gets a concept. I also enjoy it when students are learning a new mathematical technique and ask me what they will ever use it for; that's a great excuse to talk about some of the work I've done with industry and explain how differential equations can be used to model coffee brewing, or how integrals can be used to describe the molding of contact lenses."

CIM

Our strong links with the Chartered Institute of Marketing (CIM) mean that you may have the opportunity to gain CIM qualifications alongside studying for your degree.*

Given the complexity of multinational business in today's dynamic environment, it's crucial for organisations to consider the execution and strategic importance of marketing and communication, which can breakthrough complex challenges related to business or organisations.

Marketing a product or service requires analysis, vision and logic. It's one of the more creative areas of business, enabling you to build your understanding of consumers, organisations, markets and the most effective techniques and strategies to make your organisation or brand a success.

Marketers have always fought to gain their customers attention. As brands and organisations try to capture customers from across the world, understanding internal and external factors, implementing strategy and choosing the right media channels to captivate your audience needs to be considered on a global scale.

The Pitch

Undergraduate marketing students compete annually in L'Oréal's Brandstorm and the Chartered Institute of Marketing (CIM) "The Pitch" competition.

Strategic communication covers issues, insights and concepts shaping society and business, both now and in the future.

In an increasingly interconnected and resource-constrained world, businesses and business leaders are now faced with global development and concepts such as environmental awareness, sustainability and wider humanitarian challenges related to business and leadership. Knowledge of the strategic importance of communication to contemporary organisations and its impact on society is highly sought after by employers.

Our postgraduate degrees also offer the opportunity to undertake an additional 6-month placement at the end of the 12-month programme. This 'Professional Practice' route enables students with limited experience to put the skills and techniques developed throughout the Master's degree into practice.

**Excluding all postgraduate courses, Business and Marketing BA(Hons) and Global Marketing (Top-up) BA(Hons).*

"The support available from Huddersfield Business School was really helpful. Especially the support throughout my placement year, while stepping out of my comfort zone and getting real life business experience."

6th overall

Our student Team HARE came 6th overall in IMechE's Europe's Formula Student 2019 competition.**

Engineers working in new and emerging fields such as advanced manufacturing and green technologies are becoming increasingly important in world economies. They are also making our lives easier and helping to reduce living costs as we become less reliant on expensive fossil fuels. Business and industry need engineers to solve problems and become more competitive in global markets.

Our Master's degrees are delivered with a balanced combination of theory and practice. Whether you are progressing from education or currently working within the engineering industry, we aim to provide you with the required knowledge, skills and experience.

Our undergraduate courses provide you with the tools to get to grips with the fundamentals of engineering so that you can specialise moving forward.

We offer the chance to study Integrated Master's*** courses if you really want to continue to get to grips with your discipline. All of our full-time undergraduate courses include an optional year in industry. Our Placement Unit aims to support you in finding suitable employment in order for you to gain valuable experience. Some of our Master's courses offer a 6-month placement where you can undertake a period of development through study or by working with a company, research group or within a teaching environment in the UK or overseas.

Throughout your time with us you'll be studying in state-of-the-art facilities. You'll have access to design and analysis software, an advanced automotive laboratory with vehicle and engine test facilities, a railway locomotive test facility and a wind tunnel.

*The Guardian University League Tables 2020.

**Each year, Formula Student sees over 100 university teams from around the globe travel to the Silverstone circuit in UK to compete in events that test the students' preparation and hard work.

***An Integrated Master's is an undergraduate degree where you can study for an extra year to graduate with a postgraduate qualification.

“Studying engineering allows me to step closer to reaching my goal of working in the motorsport industry. I enjoy the course as it also allows me to think critically and apply creative ideas in design modules. I have completed a placement year with Cummins which provided me with invaluable experience.”

There are PhDs and Master's by Research degrees available in this subject.

You need to know...

State-of-the-art facilities

HD TV studio, news centre, latest industry software, state-of-the-art video equipment, video editing suite and digital radio studios.

Future Focused

We offer an innovative mix of creative, technical and analytical skills for the digital world.

Digital technologies change how we live. Social media, mobile phones and streaming platforms change what we watch, how we follow sports and engage with politics. Come and join us to get ahead in the digital world by studying one of our cutting-edge courses.

Our Media degrees offer you a wide mix of modules and lots of option choices, preparing you for the widest range of careers across the industry as you learn how to produce content for a range of media and understand their users and fans.

Journalism courses in the department allow you to specialise in particular journalistic careers, and develop hands-on skills such as sports commentary, television reporting, or writing for magazines, while you'll learn everything you need to know about the workings of the industry.

If you are a fan of screen entertainment, our Film Studies courses offer everything from studying Hollywood films to creating your own audio-visual works.

Our facilities reflect the emphasis of our courses on the latest digital technologies: digital TV studios, a brand-new news centre with the iNews system, high quality professional video cameras, 60 AVID video editing suites and five digital radio studios. Our graduates have gone on to many inspiring jobs, working for organisations including BBC Breakfast, Sky News, ITV Yorkshire, The Daily Mirror, The Press Association, Capital Radio and Premier League football clubs.

Our interdisciplinary approach allows our research students to focus on a wide range of areas such as digital media, fan cultures, user participation, user generated content and transmedia narratives, film and television studies, media and sport, cultural globalisation, media and power, media and identity, media history, the interplay of popular and political communication, journalism practice and theory, and investigative journalism. Our taught MA in Participatory Culture and Social Media, focusing on fans, activists and politics on Web 2.0 and beyond, is the first of its kind in the UK.

“My favourite part about the course is that it combines theory with practice. Not only am I gaining relevant knowledge in the field of journalism, but I am also learning practical skills, such as magazine design and video making. Apart from this, I am benefiting from comprehensive teaching methods and I have the possibility of undertaking a work placement with a local company.”

Queen's Anniversary Prize

The University has won the Queen's Anniversary Prize in 2015 for expanding the global boundaries of new music. This is one of the most valued distinctions in UK Higher Education.

Career Prospects

Our graduates work for companies such as Abbey Road Studios, Solid State Logic, ITV, BBC, Kiss FM, British Grove Studios and Metrophonic.

Whether you are interested in composition, performance, musicology, music production, sound engineering or technology, join us to prepare yourself for today's job market and develop your skills and creativity to their full potential.

We offer a broad range of courses from the creative to the technical, covering all genres of music. So whether you love hip hop, EDM or metal, or your interest lies in classical or electroacoustic music, we have a course at Huddersfield to suit you. You'll be taught by accessible and knowledgeable tutors who are active as composers, engineers, performers, producers and researchers and who understand the industry and will support you in gaining the skills that are in demand. You will also have the opportunity to take part in workshops and masterclasses given by leading performers and industry experts. Recent visitors include Emma Kirkby, Richie Hawtin, Craig Blundell, Robert Henke and Andrew Scheps, who has mixed records for Metallica, Red Hot Chili Peppers, Adele, Jay-Z and many more.

We've invested £200,000 in upgrading our industry standard studios. Our facilities are inspiring and built to the highest professional specifications. We've got six modern professional-spec recording studios, 12 production studios and over 100 Mac-based digital audio workstations.

We have two superb concert venues, 26 practice rooms, an early music studio, and a fine collection of instruments, including percussion, organs, historical keyboards, and a range of popular and orchestral instruments. We also have location recording equipment, a dedicated live sound room, a radio studio, a Foley studio, and a 25-speaker custom built research lab, all waiting for you to come and explore.

We encourage all students on our taught courses to take a short-term or year-long placement. Previous students have enjoyed placements with Warner Music, West Yorkshire Playhouse, Phoenix Radio, Buxton Opera House, Avid Studios and British Grove Studios.

*QS World University Rankings by Subject 2019.

"I chose to study abroad as this type of course does not exist in Poland. I chose the University of Huddersfield because of its stunning facilities and beautiful campus. I am very happy I came here and without any doubt I can say that it was the best thing I have ever done. Everyone is very friendly and the support from academics is simply amazing."

Facilities

The University is investing £18.2m in new science facilities and laboratories for Applied Science students, opening in Autumn 2019.

100%

100% of our Pharmacy graduates go on to work and/or further study within six months of graduating.*

At Huddersfield, we know that studying science goes way beyond the lab. So if you love solving problems, enjoy helping people and want to boost your science know-how with a view to a health-related career, then Pharmacy could be for you.

Accredited by the General Pharmaceutical Council (GPhC), our MPharm degree is designed to offer a varied learning experience while giving you the chance to gain a strong foundation in the pharmaceutical sciences. So by studying with us, you'll be able to combine the theory of science with developing and trying out the practical and professional skills you'll need to launch your career. Throughout this four-year course, you'll be focusing firmly on medicines and patients. As you progress, you'll have the chance to get to grips with all aspects of the industry, from understanding the development and design of drugs to investigating the role of pharmacists in society. While you're here, you'll be able to work in our formulation laboratory where medicines are made.

Beyond the lab, we also help you build your understanding of how the work you do will have a real impact on people.

Should you wish to pursue postgraduate studies, then the Pharmaceutical Business MSc or Pharmacy Practice MSc courses may be of interest. The Pharmaceutical Business MSc suite offers two MSc courses integrating pharmaceutical sciences with business strategy. You'll have the opportunity to learn the processes involved in discovering a new drug or developing a new formulation and incorporated business strategies.

We have three MSc courses within the Pharmacy Practice suite, which provide an overview and experience of pharmacy practice within the UK, with routes specialising in community pharmacy, hospital pharmacy and pharmacy practice research. The degrees offer a unique blend of knowledge and training with practical experience in popular career pathways in the pharmacy profession: community and hospital pharmacy and academia.

*The Guardian University League Tables 2020.

"I was attracted by the University's good reputation in pharmaceutical science. In addition to satisfying my scientific needs, I find the support is excellent and the University is a friendly international environment."

Social Work MSc

There are PhD and Master's by Research degrees available in this subject.

You need to know...

93%

93% of graduates from our Social Science courses go onto work and/or further study within six months of graduating.*

6th in the UK

We are ranked 6th in the UK and 1st in Yorkshire for Sociology courses.**

This fascinating subject area is ideal for those with enquiring minds who are keen to understand people and the societies that shape them. It covers many aspects of human behaviour, helping us form opinions, understand the human psyche and make a difference to the world around us.

Whether your interests come from a psychology, health, social care or criminal justice background, our courses will offer you the opportunity to further develop and extend your particular area of specialism. The courses aim to increase the depth and breadth of your knowledge, enabling you to practice at the leading edge of research and development.

Interest areas are vast and include service user and carer perspectives, managing quality in health and social care, offender profiling, as well as cognitive and developmental psychology.

Recent graduates have gone on to work in a wide range of careers, including crime and intelligence, behavioural investigation, forensic lecturing and specialised positions within safeguarding.

Previous students have gone on to work within local social services departments, as well as within the voluntary, independent and not-for-profit sectors.

*Destination of Leavers from Higher Education Survey 2016/17.

**The Guardian University League Tables 2020.

“I enjoyed studying the Psychology MSc, the course materials were informative and relevant to my future career. The support staff were very helpful and the lecturers were enthusiastic about the subjects they taught. I found Brightspace to be a useful tool, it was interactive and highlighted the lecturers’ professionalism as they were responsive, positive and ready to help with advice via the module forums.”

Applying to Huddersfield

We accept a wide range of international qualifications and when you apply for a place, your application will be examined and an offer will be made to you subject to meeting University entry requirements. This will be confirmed by email and on MyHud, which is your personal applicant portal. You will be provided with full details for MyHud once you submit your application.

English Language Skills

For students whose first language is not English, the University requires a recognised qualification in English language before you can begin the course.

Acceptable English Language qualifications

The qualification the University normally requires is an IELTS 6.0 (with a minimum of 5.5 in all bands) in the International English Language Testing System (IELTS) or equivalent.

Please note that some courses require a higher level of English, therefore please see the specific course details at [courses.hud.ac.uk](https://www.hud.ac.uk/courses)

What if I don't meet these entry requirements?

We appreciate that when you submit your application you may not have taken an English Language test, or if you have, it may not be to the level we require. The University therefore provides a wide range of Pre-Sessional English Programmes, which will prepare you for your degree studies, and enable you to meet the language requirements for your chosen degree.

Please see page 52 of the prospectus or visit [hud.ac.uk/international](https://www.hud.ac.uk/international)

Portfolio

If you are applying for an Art, Design and Architecture degree, you must submit a portfolio to demonstrate your artistic ability. You must also provide a portfolio/audition if you are applying for a Music degree to demonstrate your performance or musical ability. You can still apply without a portfolio/audition, however this will be added as a condition of the offer.

ATAS

Postgraduate students may have to obtain 'ATAS Clearance' before applying for a student visa. This will be made a condition of the offer and full details will also be included. Full details can also be found at [gov.uk/guidance/find-out-if-you-require-an-atas-certificate](https://www.gov.uk/guidance/find-out-if-you-require-an-atas-certificate)

Interviews

Some degree programmes require a Skype interview with the Admissions Tutor. If this is required, it will be stated as a condition of your offer and the Admissions Tutor will contact you to arrange this. Drama programmes may also require an audition as part of the interview.

Fees and scholarships

International Tuition Fees

(September 2020 and January 2021)

European Union tuition fees and loans

Please see hud.ac.uk for details of European Union tuition fees and loans.

Scholarships

International tuition fees and scholarships

£2,000 scholarships available for each year of your course

You are automatically considered, so you don't need to apply. Applies to self-funded students only, for all undergraduate and postgraduate taught programmes.

Additional scholarships

The University has a number of additional scholarships, for specific countries, courses and other purposes. Please see hud.ac.uk/international to check your eligibility.

Flexible payment options

50% deposit, the balance to be paid by 31 January (September starts) or 31 May (January starts).

Guaranteed tuition fees for the length of your course

What you pay in year one is what you pay in subsequent years, with no annual increase, as long as you do not take a break from the course.

A low cost of living

Huddersfield is an affordable place to live; making your university experience not only memorable, but also excellent value for money. Below are some examples of typical costs to give you some guidance on how much you'll need to live on as a student below.

These expenses will vary from person to person according to lifestyle and circumstances.

For visa purposes, the UK Government recommends that undergraduate students will need approximately £9,135 for nine months and postgraduates will need approximately £12,180 for 12 months of study.

	Cost Per Week		44 Week Term	
	Low	High	Low	High
Approved accommodation in Huddersfield	£70	£105	£3,080	£4,620
Food/housekeeping	£30	£40	£1,320	£1,760
Travel	£5	£10	£220	£440
Phone	£5	£10	£220	£440
Content insurance	£2	£3	£88	£132
TV license	£3	£3	£132	£132
Social costs	£30	£40	£1,320	£1,760
Totals			£6,380	£9,284

Applying for your studies

1

Choose

Use the subject pages in this prospectus (pages 62-117) to find your perfect course. You can find full details, including entry requirements, for all our courses at courses.hud.ac.uk

You can also join us for free online webinars and live chats to learn more about our courses and student life in Huddersfield throughout the year.

2

English language

If you need additional help to develop your English language and study skills, then our Pre-Sessional English language programmes will help prepare you for your chosen degree.

Find out more at hud.ac.uk/international/pre-sessional-english

3

Apply

You can apply for your undergraduate or postgraduate studies using our online application form at hud.ac.uk/international/applying-to-the-university

For undergraduate degrees you can also make your application through UCAS (additional fees apply).

4

What next?

We'll send you an email confirming your application and provide you with account details for MyHud. Here you can track the progress of your application.

5

Your offer

Congratulations! If you meet the entry requirements for your course, we'll provide you with a conditional offer. Accepting your offer allows us to reserve a place on the course for you.

You'll need to confirm as soon as you meet the conditions of your offer by uploading details into MyHud.

6

Confirmation of Acceptance for Studies

Once you've met all the conditions of your offer, we'll issue you with a Confirmation of Acceptance for Studies (CAS). You'll need the CAS to apply for a student visa and to travel to the UK.

Your CAS will be available to download in MyHud.

7

Prepare to join us

We can't wait to meet you soon! You can find full details plus useful hints and tips on how and what to prepare for joining us here in Huddersfield at hud.ac.uk/international/leaving-for-the-uk

If you've got any questions then don't hesitate to contact the International Office at international.office@hud.ac.uk

Important information

This prospectus was prepared in the summer of 2019 for courses starting in September 2020 and January 2021 and is up to date as at the date of publication. Any subsequent changes to information will be published in the course information listings on our website courses.hud.ac.uk and you should check our website for the latest information before you apply.

Changes to your course you have applied for

If we propose to make a major change to a course that you are holding an offer for, then we will tell you as soon as possible so that you can decide whether to withdraw your application prior to enrolment.

Changes to your course after you enrol as a student

We will always try to deliver your course and other services as described. However, sometimes we may have to make changes as set out below:

Changes to option modules

Where your course allows you to choose modules from a range of options, we will review these each year and change them to reflect the expertise of our staff, current trends in research and as a result of student feedback or demand for certain modules. We will always ensure that you have a range of options to choose from and we will let you know in good time the options available for you to choose for the following year.

Major changes

We will only make major changes to the core curriculum of a course or to our services if it is necessary for us to do so and provided such changes are reasonable. A major change in this context is a change that materially changes the services available to you; or the outcomes, or a significant part, of your course, such as the nature of the award or a substantial change to module content, teaching days (part-time provision), classes, type of delivery or assessment of the core curriculum.

For example, it may be necessary to make a major change to reflect changes in the law or the requirements of the University's regulators; to meet the latest requirements of a commissioning or accrediting body; to improve the quality of educational provision; in response to student, examiners' or other course evaluators' feedback; and/or to reflect academic or professional changes within subject areas. Major changes may also be necessary because of circumstances outside our reasonable control, such as a key member of staff leaving the University or being unable to teach, where they have a particular specialism that can't be adequately covered by other members of staff; or due to damage or interruption to buildings, facilities or equipment.

Major changes would usually be made with effect from the next academic year, but this may not always be the case. We will notify you as soon as possible should we need to make a major change and will carry out suitable consultation with affected students. If you reasonably believe that the proposed change will cause you detriment or hardship we will, if appropriate, work with you to try to reduce the adverse effect on you or find an appropriate solution. Where an appropriate solution cannot be found and you contact us in writing before the change takes effect you can cancel your registration and withdraw from the University without liability to the University for future tuition fees. We will provide reasonable support to assist you with transferring to another university if you wish to do so.

Termination of course

In exceptional circumstances, we may, for reasons outside of our control, be forced to discontinue or suspend your course. Where this is the case, a formal exit strategy will be followed and we will notify you as soon as possible about what your options are, which may include transferring to a suitable replacement course for which you are qualified, being provided with individual teaching to complete the award for which you were registered, or claiming an interim award and exiting the University. If you do not wish to take up any of the options that are made available to you, then you can cancel your registration and withdraw from the course without liability to the University for future tuition fees and you will be entitled to a refund of all course fees paid to date. We will provide reasonable support to assist you with transferring to another university if you wish to do so.

Our agreement with you

When you enrol as a student of the University, your study and time with us will be governed by a framework of regulations, policies and procedures, which form the basis of your agreement with us. Details of these, together with information regarding tuition fees and any applicable additional charges can be accessed from [hud.ac.uk/international](https://www.hud.ac.uk/international)

You should read these carefully before you enrol. Please note that this information is subject to change and you are advised to check our website regularly for any changes before you enrol at the University. A person who is not party to this agreement shall not have any rights under or in connection with it. Only you and the University shall have any right to enforce or rely on the agreement.

Equal opportunities

The University of Huddersfield is an equal opportunities institution. We aim to create conditions where staff and students are treated solely on the basis of their merits, abilities and potential, regardless of gender, age, race, caste, class, colour, nationality, ethnic or national origins, marital status, disability, sexual orientation, family responsibility, trade union activity, political or religious belief, or age. Please visit our website to see our Equal Opportunities and Diversity Policy [hud.ac.uk/d3d](https://www.hud.ac.uk/d3d)

Data protection

The University holds personal data on all enquirers, applicants and enrolled students. All such data is kept and processed in accordance with the provisions of the UK's Data Protection Legislation. The University's privacy notices are available on the University website. For more information, visit [hud.ac.uk/informationgovernance/dataprotection](https://www.hud.ac.uk/informationgovernance/dataprotection)

Students' Union membership

Under the 1994 Education Act, students at all UK universities have the right to join, or not to join, the Students' Union. There is no membership fee. If you choose not to join you have the right not to be disadvantaged; however, you are not entitled to vote, take part in elections, or hold any office. The following arrangements apply in order that non-Union members are not disadvantaged:

- ◆ Non-members are welcome to take part in the activities of Affiliated Clubs and Societies on payment of the appropriate subscription. However, they may not vote or hold office in the society or club. Union members may be offered a discounted subscription.
- ◆ Non-members are free to use Union facilities on the same basis as members.
- ◆ Welfare, catering and shops are available to non-members as well as members. Union members may be offered a discounted price.

The University's Alumni Society

How you benefit after you graduate

Your relationship with the University of Huddersfield doesn't end at graduation; you progress from being a student to being a graduate or 'alumnus', when you will become a member of the University's global alumni network covering more than 130 countries.

Just search for "University of Huddersfield Alumni Society" on:

 University of Huddersfield Alumni Society

 UoHalumni

 @HudAlumni

 huddersfieldalumni

There are also several international alumni societies on Facebook for University of Huddersfield graduates.

These societies are a great way to renew friendships, network with other graduates from your country and attend in-country reunions.

For an up-to-date list of the international alumni societies visit hud.ac.uk/alumni/international-alumni

International Huddersfield Alumni also benefit from:

- ◆ Automatic registration with the Grad Jobs Bureau, including free careers advice for life
- ◆ Generous scholarship support towards continuing study
- ◆ Membership of the University of Huddersfield Alumni group on LinkedIn
- ◆ Ongoing access to graduate-level jobs via the University's JobShop
- ◆ Discounted life membership of the Students' Union.

Getting here

Whether travelling by air, rail or road, the University of Huddersfield is easily accessible.

Rail

Rail services operate from many cities. Approximate travelling times from the airports to Huddersfield are:

- ◆ Manchester: 1 hour
- ◆ Leeds: 1 hour
- ◆ Liverpool: 2 hours
- ◆ London: 2 hours 30 mins

Find out more at nationalrail.co.uk

Gateway to Europe

Studying at Huddersfield also allows easy access to Europe.

Flights from Manchester Airport vary from 1½–4 hours and you can visit cities such as:

- ◆ Amsterdam, Netherlands
- ◆ Athens, Greece
- ◆ Barcelona, Spain
- ◆ Berlin, Germany
- ◆ Budapest, Hungary
- ◆ Lisbon, Portugal
- ◆ Paris, France
- ◆ Prague, Czech Republic
- ◆ Rome, Italy

Air

Our closest major airport is Manchester International Airport, which connects with most international cities.

Leeds Bradford International Airport also has an increasing number of direct international flights.

Don't forget to tell us when you will be arriving. We offer a Manchester Airport meet and greet service which you can book in advance.
